

1. Create database named: FacultySystemDB.

2. Create collection (student) that has:

- FirstName: string, LastName: string, Age: Number, Faculty: An object that has Name and Address
- Grades: An array of objects, each object has: CourseName, Grade, Pass (Boolean).
- IsFired: Boolean

3. Insert 3 (at least) documents in Student collection with different values.

- Try inserting one record each time
- Try inserting many students using one insert statement.

```
db.student.insertOne({
  "FirstName": "Mina",
  "LastName": "Nagy",
  "Age": 30,
  "Faculty": {
    "Name": "Engineering",
    "Address": "Cairo"
  },
  "Grades": [
    {
      "CourseName": "C",
      "Grade": 100,
      "Pass": true
    },
    {
      "CourseName": "C++",
      "Grade": 95,
      "Pass": true
    },
    {
      "CourseName": "Linux",
      "Grade": 90,
      "Pass": true
    }
  ],
  "IsFired": false
});
```
